

# How to adjust the time on a position(s) in EMS

Jane Niven, Head of Support

October 2025

**When you need to adjust the time on one or more positions you can use the Timeslice function in EMS.**

Select the time (or multiple times) and from the Options select Timeslice +/-.

Then select ADD/DEDUCT and type in the time required (mm:ss).

You can choose to PREVIEW this change, or select DO IT.
